

## Liquid Gold Leaf

Liquid Gold Leaf is a high-quality, unique gold coating, that produces the ultimate in brilliance and sheen. It is a high-performance water-based product that rapidly dries 'as seen' and its rich, gold patina is retained year after year.

Capable of adhering to most common substrates, Liquid Gold Leaf is exceptionally versatile and can be used in many interior and exterior applications without the need for a primer.

### Unique Features of Liquid Gold Leaf

- Hardwearing
- Water-based and low VOC
- Ideal for interior and exterior surfaces
- Exceptional coverage (a little goes a very long way)
- 1 hour drying time\* (see drying times below)
- Has superior flow and brush-ability and is also suitable for spraying
- 1 pack formulation, ready to use. For spraying – simply adjust viscosity by very carefully adding up to 10% water (max.)
- Excellent gloss retention
- Stable product; no skinning, thickening or waste
- High opacity with outstanding mileage and coverage
- Exceptional optical brightness and shine

### Typical Applications

- Railings and gate decoration
- Furniture restoration
- Historical building restoration – e.g. gold leaf touch-up, decorative architrave, picture rails, etc.
- Building signs – house names/numbers
- Wooden picture frames
- Arts and craft

**Preparation:** Ensure surfaces to be coated are clean and free from debris, that all remnants of any previous coatings are removed and that the surface to be painted is completely dry.

### Stir well before use.

Give surfaces a wipe with a preparatory cleaner before application, to remove all traces of contaminants.

We recommend 2 coats of Liquid Gold Leaf applied directly to the untreated surface.

We further recommend testing on a small discreet area before committing to a large job.

Clean brushes with water and can be thinned with water up to max. 10%

Always use less and add more if needed .

23.5 Carat Gold Leaf – a water-based gold paint, carefully matched to accurately resemble real gold leaf. It can be used to conveniently and invisibly touch-up existing gold leaf at a fraction of the cost. No need to invest the time or expense of priming the surface and applying gold leaf; simply remove traces of flaking gold leaf, and carefully apply one or two coats of 23.5 Carat Gold Leaf.

### Drying Time

Liquid Gold Leaf is very fast drying.

Drying time is affected by temperature, humidity and airflow/ventilation and depends on the substrate it's applied to and the thickness of the coating, but as a rough guide:

Touch dry – 1 – 3 hours

Through dry/fully cured/ready for re-coating – 3 – 6 hours
